searchCrystal and Set Visualization

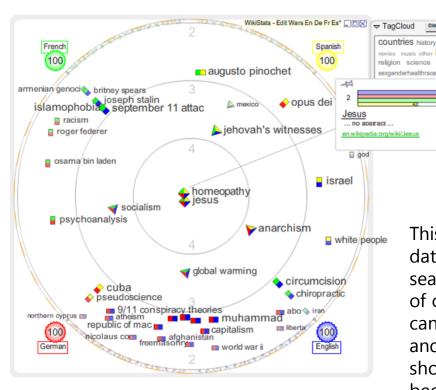

Prof. Anselm Spoerri

School of Communication and Information - Rutgers University

Monday May 26, 2014, 14.15-15.15

Room 3137, Høyteknologisenteret (data blokk)

Abstract

This talk will address how set data can be visualized using searchCrystal, which is a toolset of coordinated visualizations that can be used to compare, remix and share set data. It will be shown how searchCrystal has been used to visualize meta search data and what is popular or controversial in Wikipedia.
